

scroll(1) - Linux

man page

Name

`scroll` - page viewer with auto-scroll capability

Synopsis

```
scroll [ filename ]  
cat [ filename ] | scroll
```

Description

Scroll offers line-by-line, page-by-page, and automatic scrolling capabilities. Scroll adjusts page size depending on terminal size. Scroll accepts no more than one file at a time and offers no flags.

To read, files must be of readable text format.

Scroll will not adjust window size if the terminal size is adjusted during the scroll process.

To start, scroll can be provided with a file name. If no file name is provided, scroll will handle input from stdin. This allows piping.

Commands

SPACE

Display the next screenful of text.

RETURN

Toggle Auto-Scroll

F

Accelerate Auto-Scroll

S

Decelerate Auto-Scroll

q or **INTERRUPT**

Exit
